			GEN	NERAL INFO	RMATION I	PERTAINING	G TO WATER	RIGHTS	N CALIFORNIA		

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of grondwater, or other "foreign" water to the natural stream svstem.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Wate Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

PACIFIC GAS AND ELECTRIC COMPANY

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriations.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different water-shed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filled by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

#### STATEMENT OF WATER DIVERSION AND USE

5 968

This statement should be typewritten or legibly written to ink.

A.	Name of person diverting water Pacific Gas and Electric Company
	Address 245 Market Street, San Francisco, California 94106
В.	Name of body of water at point of diversion Rock Creek
	Tributary to Bear Creek
C.	Place of diversion SE 1/4 SE 1/4 Section 28 Township 13N Range 8E M.D. Back,
	PLACER County, or locate it on sketch of section grid on reverse side with regard to section lines or
	prominent local landmarks.
D.	Name of works Rock Creek Reservoir
E.	Capacity of diversion works cubic feet per second
	Capacity of storage reservoir gallons
	Scate quantity of water used each month in guillous see acre-feet
	Year Jan. Feb. Mar. Apr. May June July Aug. Sept. Oct. Nov. Dec. Annual
	1966 215 184 169 135 167 65 34 22 18 15 75 121 1220
	If monthly and annual use are not known, check months in which water war used. State extent of use in units, such as
	acres of each crop irrigated, average number of persons served, number of stock watered, etc.
	The state of state and state of persons served, number of state watered, etc.
	Maximum annual water use in recent years.
	Minimum annual water use in recent years.
	Type of diversion facility: gravityX, pump
	Method of measurement: weir, flume, electric power meter, water meter, estimate
F.	Purpose of use (what water is being used for) Generation of electric energy, irrigation and
	domestic use
c	
	General description or location of place of use (use sketch of section grid on reverse side if you desire)  Wise hydro electric plant and other uses in Placer County
u	
	L. Year of first use as nearly as known 1917.
I.	Name of person filing statemen: Hugh R. Deniels Manager-
	Position Hydro Generation Dept. Organization Pacific Gas and Electric Company
	Address 245 Market Street, San Francisco, California 94106
1	certify that the foregoing statements are true and conject to the best of my knowledge and belief.
D	rate signed since 5, 1967 Signature Weigh C. Sameles
